

# ONLINE ADVISORY PROGRAMME

INTERNATIONAL SMART CITIES NETWORK ONLINE EVENT 1<sup>st</sup> December 2022

## Enhancing Urban Resilience: Using Digital Solutions for Smart Water Management

### GENERAL INFORMATION

With the [Online Advisory Programme \(OAP\)](#), the ISCN continues the successful cooperation with our partners worldwide and it expands the demand-oriented knowledge transfer within the network. This online event series is a dedicated programme for networking and connecting with international experts.

### WHAT YOU CAN EXPECT

Water is the most important resource on earth. Without water there is no life possible. However, too much water through heavy rainfalls, monsoons, or floods can pose a great threat to urban settlements from Goslar in Germany to Bhubaneswar in India.

This edition of the ISCN’s Online Advisory Programme will showcase challenges and innovative use cases from projects in Europe and MENA. The projects will show how the use of digital and data-driven tools can support communication and forecasting of extreme weather events such as heat waves and prolonged drought or heavy rainfalls and floods, and strengthen the overall resilience of cities and regions by creating smart water societies.

### TIME MANAGEMENT

Since we will welcome participants from all around the globe, we made a balancing act concerning the starting hour. Please find the respective timetable for each country below. We kindly ask you to **enter the online meeting room 15 minutes before the start of the event** so that we can begin on time.

UTC (Coordinated Universal Time)	Local Time	
01:00 PM – 02:30 PM	07:00 – 08:30 AM	Mexico
	08:00 – 09:30 AM	Peru
	10:00 – 11:30 AM	Brazil
	02:00 – 03:30 PM	Germany
	06:30 – 08:00 PM	India

## ACCESS LINK TO THE EVENT

To register for the meeting please [click here](#) or the button below:
